Poured with clean up

Sour Boss 9

2/3 of the heifers are home raised on the ranch. The remainder 1/3 came from the Penrhos Farms of Britton, South Dakota. Penrhos is also a customer of Topp Angus. They were grazing corn stalks and cover crop until the 14th of December and have been on a 42mg tmr force fed a late gestation mineral. The heifers have to walk about a half mile from feed to water to get exercise. They have been moved by horses and four wheelers. The home raised heifers have RFID Bangs tags. All heifers are cake broke.

Thanks
